ESL	http://www.heinemann.com/shared/products/E00057.asp	“Language minority students, including Limited English Proficiency (LEP) students, constitute the fastest growing segment of the U.S. student population today. Still, the controversy around how best to educate these students continues to swirl, with programs across the nation under attack. Now, just in time, Katharine Davies Samway and Denise McKeon have crafted an easy-to-use, exhaustive handbook to debunk the myths and describe the proven best practices in language-minority education”

The first book is Design Paradigms: Case Histories of Error and Judgment in Engineering (Petroski, 1994), the second book is The Mythical Man-Month, Anniversary Edition: Essays on Software Engineering (Brooks, 1995), and the third book is Notes on the Synthesis of Form (Alexander, 1964). In this paper, an emphasis is placed on describing the core ideas of the books. Brief discussions of structure, context, failure, and usability engineering are included to highlight several themes found throughout the trio of books.
